KeySource generic pharmaceutical supplier sponsors caps and gowns for local high school

[MAY 28, 2020 - LOCKLAND, OHIO] Supporting this year's 2020 graduates is a group effort as these brave individuals celebrate their accomplishments and conclusion of school in new, innovative ways. KeySource, a leading supplier of generic pharmaceuticals, is here to help – demonstrating once again an unwavering support and commitment to their local community.

KeySource recently sponsored Lockland High School in Cincinnati, OH, financing the graduating seniors' caps, gowns and graduation tassels for the graduation event. Although the actual May ceremony has been postponed until August 5, due to COVID-19 restrictions, KeySource has continued to help the seniors celebrate in style.

Lockland High School seniors received their caps and gowns on the third week of May. With current COVID-19 precautions, KeySource officials were unable to attend to voice their support for the students, but they sent a congratulating banner to let the class of 2020 know they were proud of their achievements and valued the opportunity to sponsor them. School officials, students and parents expressed their appreciation. In addition to donating caps and gowns for Lockland High School, KeySource remains active in the community, supporting numerous worthwhile local causes.

Congratulations to the Lockland High School Class of 2020 and all other graduates celebrating their achievements during this season! Hats off to each of you from KeySource!
